

The Outcomes/Injury Survey will be sent to all participants in the Wisconsin Sleep Cohort study who as of the mailing were not deceased to our knowledge.

After the first mailing of the survey, when participant envelopes come back with no forwarding address, we plan to contract with a professional service such as Lexis Nexis to find updated addresses. We have important information (name, birth date, gender, previous addresses) which will help these professional data bases accurately find the most current nationwide address for our participants.
